Advanced polycrystal mechanical modeling: The Crystal

Various concepts exist to introduce texture-related sheet anisotropy into finite element models for sheet forming. The initial material anisotropy existing before sheet deformation can be incorporated either through an anisotropic yield surface function or directly via the incorporation of crystallographic texture models into the finite element codes.

1. Introduction. It is quite obvious that selection of a proper material model and determination of its parameters have a great influence on the accuracy and reliability of results of the finite element analysis of rubber articles such as tyres, engine mounts, and rubber bearings.

Specific problems regarding the sealing of doors and windows for the automotive industry will be considered in this work. Two main problems must be assessed for predicting sealing capabilities and close-up forces involved, firstly it is mandatory to identify the chemical and the mechanical properties for the rubber used on profiles.

A finite-state machine (FSM) or finite-state automaton (FSA, plural: automata), finite automaton, or simply a state machine, is a mathematical model of computation. It is an abstract machine that can be in exactly one of a finite number of states at any given time. The FSM can change from one state to another in response to some external inputs; the change from one state to another is called a ...

Computational fluid dynamics (CFD) is a branch of fluid mechanics that uses numerical analysis and data structures to solve and analyze problems that involve fluid flows are used to perform the calculations required to simulate the interaction of liquids and gases with surfaces defined by boundary conditions. With high-speed supercomputers, better solutions can be achieved.

Preservation of Knowledge, peak oil, ecology - Cars, light trucks, and buses are irrelevant to preventing collapse. Short-haul trucks are triple the cost of a diesel equivalent on average, and at least 10 times more

than a used short-haul trucks.

Diesel is finite. Trucks are the bedrock of civilization

Hi Bob, The use of 'ing forms was touched on in a previous question (see 'ing forms and post modification '), but it's worth returning to, not least because your question raises interesting issues relating to word class and syntactic function.. The notion of word class (also called part of speech) is a convenient one for labelling purposes but tends to buckle under pressure.
