Photo-Realistic Single Image Super-Resolution Using a Generative Adversarial Network Christian Ledig, Lucas Theis, Ferenc Huszar, Jose Caballero, Andrew Cunningham,Å´

### **Christian Ledig, Lucas Theis, Ferenc Huszar, Jose**

In computer graphics and digital imaging, image scaling refers to the resizing of a digital image. In video technology, the magnification of digital material is known as upscaling or resolution enhancement.. When scaling a vector graphic image, the graphic primitives that make up the image can be scaled using geometric transformations, with no loss of image quality.

### **Image scaling - Wikipedia**

There are two approaches to improve the resolution: (i) changing the microscope design to improve the shape of the PSF (e.g. confocal, multiphoton and most super-resolution microscopy modalities), (ii) numerically inverting the blurring process to enhance micrographs: the deconvolution.

Synthetic-aperture radar (SAR) is a form of radar that is used to create two-dimensional images or three-dimensional reconstructions of objects, such as landscapes. SAR uses the motion of the radar antenna over a target region to provide finer spatial resolution than conventional beam-scanning radars.

## **Synthetic-aperture radar - Wikipedia**

Super-resolution, Style Transfer & Colourisation Not all research in Computer Vision serves to extend the pseudo-cognitive abilities of machines, and often the fabled malleability of neural networks, as well as other ML techniques, lend themselves to a variety of other novel applications that spill into the public space.
